ANNUAL REPORT 2016

Dear friends,

We appeal to you and declare publicly report on the operations of our company and the successes we have achieved in 2016!

NSAN LLC company ended the fiscal year with a total turnover of capital in the amount of US \$ 2,075,884,900.50.

Total investments in 2016 amounted to US \$ 1,780,000,000.00.

Our company has achieved minimum success of 2016 in terms of profits, primarily thanks to investments of which already in 2017 we are expecting huge profits and new investments primarily in Europe and then Central and South America, while 50% of all investments remain in the USA.

Our biggest success is a victory of Donald Trump in the presidential elections in the USA, which we wholeheartedly supported, because it is a hope for the future of USA, but also the development of other parts of the world.

The company owes its success to his own team, so I, as President and owner here indicate my team without whom the company would not have existed:
